Adra Match Accounts

Adra Match software for the automation of account reconciliation processes.

Adra Match was one of the first companies in Scandinavia in this field, and is now the European market leader in account reconciliation automation.

The company has over 20 years of experience in delivering solutions that are focused 100% on the reconciliation process. Adra Match provides an outstanding combination of technology solutions, consultancy, development and post-sales support.

The development of Adra Match Accounts has taken place in close co-operation with banks, system suppliers and customers resulting in a comprehensive process automation solution. Nearly 3,000 European companies are customers of Adra Match. The company has over 70 employees with specialist knowledge of and competence in financial accounting and finance process improvement.

Adra Match is located in Oslo, Stockholm, Copenhagen and London.

Adra Match Accounts provides reconciliation process automation and standardization for a wide range of finance processes. Whether you are focused on banking, payroll, intercompany, supplier statement or any other transaction intensive process, Adra Match Accounts brings efficiency and effectiveness to the office of finance.

Enhanced Control

Adra Match Accounts puts you in total control of your reconciliation process from input to output. You will have real-time visibility into the status of the reconciliation process, giving you the assurance that appropriate and effective controls are in place and utilized to best effect.

Improved Timeliness

Manual reconciliation takes time. By using Adra Match Accounts, you will save considerable time and you can feel confident that the reconciliation is 100% correct. The time saving makes Adra Match Accounts a very good investment, enabling you to focus on more useful and rewarding tasks.

Accuracy Assured

With manual reconciliation it is easy to make mistakes. Adra Match Accounts provides controls to help prevent common errors and functions to make it easy to rectify them if they are made.

Reduced Cost, Reduced Risk

Adra Match Accounts will often pay for itself within the first year of implementation. As a result of the automatic matching of the vast majority of transactions, time is freed up to deal with exception management and risk reduction. Adra Match Accounts will often automate up to 95% of the transactions in the reconciliation process.

Ease of Use

Adra Match Accounts has been used to solve reconciliation challenges for over 20 years. The technology has been developed by accountants, for accountants. Adra Match Accounts is easy to use and requires less than one day of training for effective use.

Ease of Integration

Adra Match Accounts is flexible enough to handle input files from all banks and financial systems that can export account information in a file. This is a standard module in almost all systems. The implementation and configuration process take a minimum of time. Adra Match Accounts contains functions to handle different reconciliation processes for all types of enterprises.

Multi-process Capable

Over 3,000 companies all over Europe use Adra Match Accounts in their reconciliation processes. Adra Match Accounts is not only used for bank reconciliation, but is also used for reconciliations of technical systems, internal account reconciliation, and for the reconciliation of inter-company accounts.
